SKILLS

- Data Structures & Algorithms
- Operating Systems
- AWS Cloud Fundamentals
- HTML/CSS
- Javascript
- Python
- SQL

EDUCATION

BS Computer Science
Bahria University, Lahore
5th Semester | CGPA:3.75 / 4.00
Expected Graduation: 2028

CERTIFICATION

- Web Dev from IDEO College
- AWS Cloud Practitioner Essential
- UI/UX Design Certification

TOOLS

- MS SQL Server Studio
- VS Code
- Adobe Photoshop
- Microsoft Office Suite

PROFILE

Computer Science student (5th Semester) at Bahria University with strong knowledge of SQL, Data Structures & Algorithms, Python and Web Development. Alongside technical expertise, possess hands-on experience in content creation. Seeking an internship opportunity to contribute to real-world projects, enhance practical skills, and grow as a technology professional.

ACADEMIC PROJECTS

Car Rental System (MS SQL Server)

- Designed and implemented a relational database system using MS SQL Server for managing customers, vehicles, and rental transactions.
- Applied database normalization, relationships, and SQL queries to ensure efficient data management and retrieval.

Restaurant Management System (C++ & DSA)

- Developed a console-based Restaurant Management System using C++, implementing data structures such as arrays, linked lists, stacks, and queues.
- Applied problem-solving and algorithmic concepts to manage orders, menu items, and billing operations.

Operating Systems Concepts Implementation

- Implemented and analyzed CPU scheduling algorithms, including FCFS, SJF, and Round Robin, to understand process scheduling and performance evaluation.
- Explored core operating system concepts such as process management and memory management through practical implementations.

AI-Powered Code Reviewer & Enhancer

- Developed an AI-assisted tool to analyze code, identify bugs, and provide debugging and optimization suggestions.
- Leveraged AI techniques to improve code quality, readability, maintainability, and overall development efficiency.
